Math Camps

2017

Why attend Math Camp? Your math grades will improve!

Math camp is live interactive tutoring with fun games and learning examples. We encourage class participation, good note taking and problem solving skills.

Algebra 1

Aug. 7 - 11 & Aug. 28 - 31, 10 am - noon

For first-time Algebra 1 students, seminar topics covered include variables and expressions, equations and inequalities, relations and fractions, linear functions and solving linear equations.

Geometry

Aug. 14 - 18 & Aug. 21 - 25, 10 am - noon

For first-time Geometry students, seminar topics include lines, planes & angles, triangles & congruency, Pythagorean Theorem, polygons and shapes, and areas and volumes.

To register or inquire

Phone 360-829-6534 or email
rstahlecker@cityofbuckley.com

Camps are held at the Buckley Youth Center, 251 River Ave N., Buckley. Registration is required. A free lunch is provided by WRSD from noon to 1. Parents are welcome to attend with their student.

Multiplication Memorization

Aug. 7 - 11 & Aug. 28 - 31, 12 - 1 pm

This popular and important child-parent interactive activity uses the Leitner method of flash card instruction with parent and student working together. Some students, as late as the 10th grade, struggle to memorize the multiplication table. Flexible attendance with your child for 3 or more sessions..

Algebra 2 & Cool Math Combo

Aug. 14 - 18 & Aug. 21 - 25, 6 - 8 pm

For first-time Algebra 2 students, or as refresher for students who are taking Pre-calculus or Calculus in the fall. Learning math can be cool and fun while preparing for success in these subjects. Topics include polynomial functions, solving quadratic equations, rational functions, powers and roots, exponential and logarithmic functions, unit circle, trigonometry and curve sketching.
